

UX Design Course: Rapid Prototyping Training Course

Discover how to effectively communicate and test your concepts and ideas before making a larger investment in your final UX design. In this session you learn how to easily and quickly build low-fidelity prototypes using both analog and digital tools. Whether you are creating a website, mobile operating system (iOS, Android, Windows Phone), or a desktop O.S. (Windows, Mac OS, Chrome), you'll learn how to reduce the time to build, while improving the experience for your user. Part of this course uses Balsamiq Mockups, an easy-to-use rapid prototyping tool.

What you'll learn in this training course

- What is rapid prototyping
- Introduction to rapid prototyping
- Creating your first low-fidelity prototype
- Testing your prototype
- Iterating your design
- Creating your Information Architecture
- Creating screens for your app or website
- Building and testing your app or website navigation
